The DA-run City of Cape Town and Sewerage Pollution Dangers

Dear Supporter,

The persistent issue of sewerage being pumped into the ocean at Strandfontein near Muizenberg beach is causing an unbearable stench and poses a serious danger to the environment, human and marine life alike. This unacceptable level of pollution has been disregarded by the DA-run City of Cape Town administration for years.

The Cape Independence Party has received various complaints in this regard from community members and has undertaken to fight this important issue. We are awaiting results from an accredited laboratory to analyse water samples obtained by party representatives while visiting the site. These results will indicate the levels of contamination of one of Cape Town's most beautiful beaches.

As the majority and ruling party of the City of Cape Town, we want to know what the DA intends to do about this sewerage disaster?

If you are a resident in the City of Cape Town and your community is experiencing similar sewerage contamination issues such as in Strandfontein, please contact Councillor Bodin at karl.bodin@capetown.gov.za so that you can help us help you, to hold the DA to account.

Cape Independence Party-CAPEXIT Thanks All Volunteers and Supporters

We wish to thank all those who have volunteered getting involved actively with the Cape Independence Party's mission to secure a referendum, those who submitted their signatures as per the new IEC requirements and those who have registered membership, volunteered to stand as candidates, and selflessly made donations.

If you still wish to make a donation, please use the SUPPORT US button below. As little as R50 per month from members and supporters who believe in Cape independence, goes a long way towards sharing the financial burden which campaigns and the contesting of elections inevitably brings down upon us.

Please continue taking further action via the other buttons below as well.
